Sector	Advanced manufacturing / defence / robotics
Stage and funding type	Series C, last valued \$175m
Problem	The world cannot make advanced metallic components and systems light and strong enough, develop them quickly enough, or manufacture them sustainably enough.
Market opportunities	Propulsion for affordable mass: better complete turbines and rocket engines for drones and counter-drones, quicker Structural components for AR/ VR and robotics: the lightest, strongest components in the world, with thermal management built in
Traction	\$25m revenue, growing 50-100% YoY. World's leading companies in aerospace and consumer electronics sectors.
Notable investors	Oxford Science Enterprises, Development Bank of Japan, Aviva plc
Team	Michael Holmes (CEO), David Crudden, Enrique Alabort (co-founders), Georgina Frater
Funding ask	\$60m for built-out of microturbine business by in-house production and fables manufacture to meet specific US / NATO defence customer requirements.
