

Beyond Limits

Headquarters: 450 North Brand Blvd Glendale, CA 91203 United States

Sector: Enterprise Artificial Intelligence (AI) | Industrial Agentic AI | Energy & Infrastructure

Stage & Funding Type: Growth stage | Venture-backed | Strategic partnerships with global energy leaders

Problem:

High friction in achieving "closed loop" automation for production and planning operations to maximize profitability with Safety Assurance. 79% plan to production average attainment rate in complex industrial environment like oil & gas, utilities and public sector infrastructure.

Solution:

Closed Loop Autonomous Automation through Hybrid Agentic AI that combines generative intelligence with proprietary Neuro-Symbolic Advanced reasoning to provide explainable, trusted autonomous decisioning for mission critical production and planning operations.

Market Opportunity:

Global Industrial AI projected at \$100B by 2030 with \$40B (40% + CAGR) plus TAM for Enterprise Agentic AI spanning energy, utilities, manufacturing and public infrastructure. Increasing demand for AI sovereignty, sustainability, and operational transformation fuels Beyond Limits' relevance

Traction:

- 15-year strategic partnership with QatarEnergy LNG, the world's largest LNG company
- AI solutions deployed with Aramco, BP, KNPC and major industrial players
- Proven technology with track record in energy, chemicals, and digital transformation

Snapshot of Lead / Notable Investors:

- BP, G42, ILA Group, Aramco

Team: AJ Abdallat – Chief Executive Officer, Mark James – Chief Technology Officer, team with Deep domain expertise in Industrial operations and planning

Funding Ask: Seeking strategic growth capital of **\$100M** to accelerate enterprise AI platform expansion across EMEA and APAC and North America

Contact Information: Frank Sansone; CFO, fsansone@beyond.ai
