

# Spirit AI

Spirit AI  
千寻智能

**Headquarters:** Beijing, China

**Sector:** Artificial Intelligence, Robotics

**Stage & Funding Type:** Pre-A, private, last evaluated at ~\$450M (May 2025)

**Problem:** As we are entering an aging society, how to resolve the lack of human labor issues? Labors escape from factories, service industries, household care etc. Human labor has become the major cost in developed countries.

**Solution:** Build intelligence robots that can do the labor works.

**Market Opportunity:** In the next 15-20 years, we anticipate 10% homes will have an intelligent robot, which will be around 5 trillion dollar. The intelligent robot market has just started. We anticipate there will be a rapid growth of the market around 30-60% YoY growth in the next 10 years.

## **Traction:**

- We are the first to deploy next-generation robotics VLA models to production, at CATL, the largest electrical battery making company.
- We have the best robot foundation models, which allows our robot to do complex manipulation tasks at high success rates, such as cloth folding, etc.
- Building intelligent robots needs strong hardware and AI at the same time, our team features more than 10 years of both robot hardware and robot AI algorithms experience.

## **Snapshot of Lead / Notable Investors:**

- P7, JingDong Ecommerce, CATL

**Team:** Fengtao Han (CEO & Co-Founder, 10+ years of robot hardware experience), Yang Gao (CTO, 10+ years of robot AI experience)

**Funding Ask:** Seeking ~ \$100M, to accelerate on R&D on the next generation robot AI system, and iterate on the next-gen more universal hardware.

**Contact Information:** Yang Gao, CTO, gaoyang@spirit-ai.com
