### SUMMIT: THE NEW LATAM ORDER

The FII New LatAm Summit will serve as the premier global platform dedicated to redefining Latin America's role in the emerging world economic order.

At a moment of profound geopolitical and economic realignment, Latin America is transitioning from a region of potential to a region of strategic execution. Rich in critical minerals, renewable energy capacity, agricultural strength, human capital, and digital innovation, the region stands at the center of global capital reallocation.

The Summit will convene heads of state, sovereign wealth funds, institutional investors, global CEOs, technology leaders, and development institutions to accelerate investment partnerships and unlock scalable opportunities across the continent.

10:00 AM – 10:05 AM

**CABARET**

Remarks

### OPENING REMARKS

**Speakers:**

- Richard Attias, Chairman of the Executive Committee & Acting CEO, FII Institute

10:05 AM – 10:25 AM

**CABARET**

Panel Discussion

### WHO CAPTURES THE UPSIDE OF THE NEW LATAM ORDER?

Ongoing political and economic shifts are shaping Latin America and the Caribbean's evolving role in the global economy. Central banks are tasked with preserving stability amid inflation and fiscal pressures; pension funds are searching for long-duration, local-currency assets; and Miami is emerging as the Western Hemisphere's deal-making hub. As this "new LatAm order" takes shape, how can opportunities be identified, financed, and scaled to support sustainable growth and shared benefits for both investors and the wider region?

**Speakers:**

- The Hon. Francis X. Suarez, Of Counsel, Quinn Emanuel Urquhart & Sullivan LLP, United States

**Moderator:** Jose Felix Diaz, Executive Vice President & Managing Partner, Ballard Partners

10:25 AM – 10:40 AM

**CABARET**

Panel Discussion

### SPECIAL ADDRESS

**Speakers:**

- H.E. Delcy Rodriguez, Interim President, Bolivarian Republic of Venezuela

**Moderator:** Richard Attias, Chairman of the Executive Committee & Acting CEO, FII Institute

WEDNESDAY, MARCH 25

FAENA HOTEL: CABARET

10:00 AM – 12:30 PM

SUMMIT: THE NEW LATAM ORDER

The FII New LatAm Summit will serve as the premier global platform dedicated to redefining Latin America's role in the emerging world economic order.

At a moment of profound geopolitical and economic realignment, Latin America is transitioning from a region of potential to a region of strategic execution. Rich in critical minerals, renewable energy capacity, agricultural strength, human capital, and digital innovation, the region stands at the center of global capital reallocation.

The Summit will convene heads of state, sovereign wealth funds, institutional investors, global CEOs, technology leaders, and development institutions to accelerate investment partnerships and unlock scalable opportunities across the continent.

10:40 AM – 11:00 AM

CABARET

Panel Discussion

AMERICAS MACRO OUTLOOK

Opportunity is ripe in Latin America and the Caribbean, but building the New LatAm Order will require massive and continued investments. McKinsey estimates that the region will need to ramp annual investment to USD 1.9–2.3 trillion – roughly 28% of GDP by 2040, up from about 20% today – to stay on a high-growth trajectory. With abundant natural resources, growing urban populations, expanding digital and industrial capabilities, and a strategic position in global value chains, Latin America and the Caribbean has the potential to become a hub for innovation, energy, critical minerals, and knowledge-based industries. As global economic shifts, rapid technological change, and evolving trade and investment patterns reshape opportunities across Latin America and the Caribbean, where are the most compelling opportunities?

Speakers:

- Norberto Giangrande Jr., Chairman, Minerva Foods
Francisco Jardim, Managing Director, SP Ventures, Brazil

Moderator: Soledad O'Brien, CEO, Soledad O'Brien Productions

11:00 AM – 11:15 AM

CABARET

Panel Discussion

IN CONVERSATION WITH H.E. MARÍA JOSÉ PINTO

Speaker:

- H.E. María José Pinto González Artigas, Constitutional Vice President, Republic of Ecuador, Ecuador

Moderator: Cécilia Attias, Founder & President, Cecilia Attias Foundation for Women, Former First Lady of France

11:15 AM – 11:45 PM

CABARET

Panel Discussion

ENABLING CONDITIONS FOR LONG-TERM INVESTMENT IN LATAM: CAN INFRASTRUCTURE DELIVER?

Latin America and the Caribbean stands at a strategic inflection point, where infrastructure investment will determine whether the region can fully capitalize on integration into global and regional value chains, demographic growth, and rapid urbanization. The Inter-American Development Bank estimates the region must invest approximately 3–5% of GDP annually to close its infrastructure gap and sustain long-term competitiveness. As global capital searches for resilient, long-duration assets, how can Latin America and the Caribbean translate its structural advantages into a scalable infrastructure growth story? What enabling conditions, partnerships, and frameworks are needed to attract financing while mitigating execution risk and supporting economic growth?

Speakers:

- H.E. María José Pinto, Vice President, Ecuador
Manfredi Lefebvre d'Ovidio, Chairman, WTTC, Monaco
Joe Sitt, Chairman & CEO, Thor Equities Group, United States
Juan Carlos Zepeda, Partner, MIP Real Assets, CEO, Quantum Energía, Mexico

Moderator: Deborah Acosta, Florida Correspondent, The Wall Street Journal

11:45 PM – 12:15 PM

CABARET

Panel Discussion

WHERE IS CAPITAL FLOWING NEXT IN THE AMERICAS' DIGITAL ECONOMY?

Across the Americas, a new generation of digital-native companies is attracting global venture and institutional capital, reshaping the region's innovation and investment landscape. Venture funding across the Americas surpassed \$180 billion in recent years, with fintech, digital infrastructure, and AI-driven platforms leading the next wave of high-growth startups. As capital, policy, and technology increasingly intersect, where will investors find the next breakout opportunities—and what conditions will be needed to scale them?

Speakers:

- Eng. Abdulrahman T. Bakir, Managing Director–Americas, Ministry of Investment of Saudi Arabia (MISA)
Gerry Giacomán Colyer, Co-founder & CEO, Clara, Brazil
Emiliano Mroue, Founder & CEO, Fibrazo, Colombia

CABARET

Fireside Chat

CAN AN INTER-AMERICAN CORRIDOR RESHAPE THE WESTERN HEMISPHERE?

Once seen primarily through the lens of need, Latin America is increasingly being recognized as a region of opportunity—across sectors ranging from critical minerals and new value-added supply chains to digital transformation and food security. According to recent UNCTAD data, Latin America and the Caribbean led middle-income economies in FDI growth in 2025, with a striking 24% increase. As trade and investment ties deepen across the Americas—and as countries that are ready move forward to integrate markets, infrastructure, and supply chains—is an inter-American investment corridor beginning to take shape, one that could reshape opportunity across the Western Hemisphere?

Speakers:

- Ilan Goldfajn, President, Inter-American Development Bank

Moderator: Soledad O'Brien, CEO, Soledad O'Brien Productions

2026 GLOBAL VENTURE OUTLOOK: EXPECTATIONS & TRENDS

Global venture enters 2026 with more capital, more companies, and expanded opportunities that will reshape how investors deploy risk. Distinct strategies are emerging—some optimized for speed and early signal, others focused on ownership, durability, and long-term resilience—reflecting a market that is broader and more sophisticated than ever. At the same time, venture is extending beyond fast-cycle investments into infrastructure, energy, advanced manufacturing, and deep R&D, applying innovation-driven capital to sectors poised for generational impact. The question for 2026 isn't whether venture will adapt—it's which strategies and innovations will define its next era of value creation?

Speakers:

- Christian Garrett, Partner, 137 Ventures; Co-Founder, Hill & Valley Forum; Co-Founder Onodrim Industries, United States
Jack R. Selby, Managing Partner, Copper Sky, United States
Dana Settle, Co-Founder & Managing Partner, Greycroft, United States

Moderator: Joseph Cass, Senior Director, S&P Global

2:10 PM – 2:40 PM

LIVING ROOM

Key Debate

FII DEBATE: WHO WINS AND WHO PAYS WHEN REGULATORY FRAGMENTATION IS PRICED INTO TECH?

Regulatory fragmentation across AI and deep-tech is turning geographic arbitrage into a strategic lever that investors and acquirers actively engineer. Bloomberg reports that at the close of 2025, companies headquartered in high-friction regulatory jurisdictions traded at 20 to 40 percent discounts, only to reprice sharply once compliance exposure could be absorbed by multinational buyers. When capital optimizes around where the rules diverge rather than where they hold, who captures the value and who absorbs the cost?

Speakers:

- Ben Casnocha, General Partner, Village Global, United States
Raj Ganguly, Co-Founder & Co-CEO, B Capital, United States
Patrick Zhong, Founding Managing Partner, M31 Capital, China

Moderator: Sasha Qadri, Presenter & Former News Anchor

2:40 PM – 3:00 PM

LIVING ROOM

Hot Seat

FII HOTSEAT: BIOTECH AS FREEDOM

Recent technological advancements have made theories of biological freedom ever closer to reality by the day. Yet, beyond the massive market opportunity, Precedence Research predicts the sector will experience 13% yearly growth for the next 10 years, the extent of the new scientific capabilities is unlocking questions with implications in fields as diverse as geoeconomics to philosophy. As biologics and cell/gene manipulation come online, what will it take to maintain the vision of biotech as a source of and tool for freedom?

Speakers:

- Christian Angermayer, Founder, Apeiron Investment Group, United Kingdom
Aydin Gokce, CEO, General Cybernetics, United States

WEDNESDAY, MARCH 25

FAENA HOTEL: LABS

3:00 PM – 3:05 PM

LIVING ROOM

Future Flash

HOW TO DEFINE CHAMPIONS OF THE INTELLIGENCE AGE

As AI reshapes industries, the defining force will not be the technology itself, but the ambition and purpose of those who harness it to transform how we live, work, and solve global challenges. The next generation of AI leaders will be driven by a conviction to create enduring value — building enterprises that scale innovation while advancing progress across sectors. This perspective sets the foundation for a forward-looking conversation on who will rise as the champions of the AI era, and what will distinguish those determined not only to lead markets, but to shape a better future.

Speakers:

- Hala Hanna, Executive Director, MIT Solve, United States

3:05 PM – 3:35 PM

LIVING ROOM

Panel Discussion

WHAT DOES IT TAKE FOR AI AGENTS TO MOVE MONEY, DATA & DECISIONS SAFELY?

As AI agents gain the ability to transact, access enterprise systems, and execute decisions autonomously, economic authority is shifting from humans to software. For companies building the models, infrastructure, and transaction rails behind this transition, the challenge is no longer capability, but control at scale. Enabling agents to move capital and manipulate data requires secure execution frameworks, resilient data architecture, and real-time oversight. As agentic systems assume direct influence over financial flows and enterprise operations, what foundations are essential to ensure autonomy strengthens institutional trust?

Speakers:

- Prem Akkaraju, CEO, Stability AI, United States
- Matthew Fitzpatrick, CEO, Invisible Technologies, United States
- Mohsen Moazami, Vice Chair, DDN, United States
- Ivan Soto-Wright, CEO & Co-Founder, MoonPay, United States

Moderator: Shu Nyatta, Founder & Managing Partner, Bicycle Capital

3:35 PM – 3:55 PM

LIVING ROOM

Panel Discussion

WHO OWNS THE EDGE IN PHYSICAL AI?

With the global robotics market projected to surpass \$100 billion by 2030, the sector has emerged as a central arena of technological and economic competition. In the U.S., dense venture networks, leading universities, and corporate R&D labs continue to anchor early-stage innovation and commercialization. At the same time, powerful ecosystems are scaling beyond the U.S., as Asia leverages industrial depth, Europe advances applied research clusters, and the Gulf deploys sovereign capital to accelerate platform development. As capital, talent, and commercialization models evolve across regions, which ecosystem architecture will ultimately define the future of the global robotics race?

Speakers:

- Cathryn Chen, Founder & CEO, MarketX Ventures, Founder & General Partner, Radiate Ventures, United States
- Erik LaPaglia, Managing Partner, NextTech Ventures, United States
- Ibrahim Abdulaziz Neyaz, CEO, National Technology Development Program (NTDP), Kingdom of Saudi Arabia

Moderator: Sasha Qadri, Presenter & Former News Anchor

### ARE INVESTORS FORGETTING WHAT POWERS AI?

Is AI the shiny object distracting investors from powering its own future? The IEA's State of Energy Innovation 2026 reveals VC for energy start-ups plunged 10% to \$27 billion in 2025—the third consecutive decline—as AI snagged nearly 30% of global deals, with top energy funds redirecting billions amid rising rates. In this hot seat interview, face rapid-fire questions on the irony, resilient fusion/grid bets, and realignment needs—audience Q&A encouraged. Will investors realign priorities to fuel sustainable energy for AI's demands?

4:10 PM – 4:40 PM

LIVING ROOM

Panel Discussion

### THE ZERO-GRAVITY SUPPLY CHAIN

While the 20th century was about "exploring" space, the 21st is about "industrializing" it. The market is hot—Brookings reports the global space economy will triple from \$630 billion in 2023 to \$1.8 trillion by 2035. How are investors underwriting these "off-world" supply chains, and when will "Made in Space" become a standard industrial label?

**Speakers:**

- Philip Johnston, CEO & Co-Founder, Starcloud, United States
- Jim Keravala, CEO, OffWorld, United States

**Moderator:** Sasha Qadri, Presenter & Former News Anchor

WEDNESDAY, MARCH 25

FAENA HOTEL: MEDIA BRIEFING & INVITE-ONLY CONCLAVES

1:00 PM – 2:00PM

MAMMOTH GARDEN

PRESS BRIEFING

Members of the press are invited to join FII Institute leadership for a media briefing at the Mammoth Garden inside the Faena Hotel.

Advance RSVP or registration is required for entry, and a valid press badge or credentials must be presented upon arrival.

Refreshments will be served.

Hosted by:

- Richard Attias, Chairman of the Executive Committee & Acting CEO, FII Institute

1:30 PM – 2:40PM

LA CAVA

INVITE ONLY: WHAT MAKES A CITY HIGH-REWARD OR HIGH-RISK FOR LONG-TERM INVESTMENT?

For decades, global real estate capital treated cities as stable, long-duration partners. That trust is breaking. Regulatory volatility, insurance retreat, and climate exposure are pushing risk down from nations to municipalities and individual assets. Capital no longer underwrites demand alone—it demands governability, insurability, and exit certainty. When thresholds are crossed, capital doesn't reprice gradually; it withdraws entirely. This creates a stark divide: cities that stay institutionally investable versus those that don't. When capital stops trusting cities, what happens to urban growth, liquidity, and long-term value?

Co-Chairs:

- Joe Sitt, Chairman & CEO, Thor Equities Group, United States
- The Hon. Francis X. Suarez, Of Counsel, Quinn Emanuel Urquhart & Sullivan LLP, United States

3:10 PM – 4:20PM

LA CAVA

INVITE ONLY: IMAGINING THE WORLD OF WORK IN 2050

AI and automation have the potential to create two very different realities by 2050: one where they power productivity growth for aging economies and unlock higher-quality employment for younger generations, and one where, lacking direction, they exacerbate inequality and social fragmentation. The future could unfold in very different ways depending on the choices made today—while some tech leaders warn AI could wipe out half of all entry-level white-collar jobs, others believe it could create 170 million new jobs globally by 2030. Looking past near-term disruption, what long-term system redesigns are necessary to ensure the technology strengthens, not weakens, the social contract?

Co-Chairs:

- Jawad Khan, Head of Workforce Development, PIF, Kingdom of Saudi Arabia
- Tarek Mansour (TJ), Senior Partner & Leader of the Public, Health & Social Practice, McKinsey & Company, United Arab Emirates

WEDNESDAY, MARCH 25

FAENA HOTEL: INVITE-ONLY CONCLAVE & ROADSHOW

1:30 PM – 2:40PM

TIERRA SANTA

INVITE ONLY: DO DIGITAL ASSETS REQUIRE CENTRALIZED CONTROL TO SCALE?

As digital assets scale globally, the systems that underpin trust, custody, identity, compliance, and settlement, are rapidly converging into a small number of powerful intermediaries. In 2025, global crypto adoption surpassed 716 million users while digital-asset theft exceeded \$2.7 billion by mid-year, driven largely by failures in custody, identity security, and infrastructure resilience. If trust must consolidate to ensure safety and scale, who should control it, and what governance constraints are required to prevent systemic risk and excessive concentration of power?

Co-Chairs:

- Maja Vujinovic, CEO, Digital Assets, FG Nexus, Managing Director, OGroupLLC
Zach Witkoff, CEO, World Liberty Financial, United States

3:10 PM – 4:20PM

TIERRA SANTA

INVITE ONLY: FII FUNDRAISING ROADSHOW: ARAMCO PORTFOLIO

It's the most exciting time to invest in industrial tech in decades—and for startup CEOs and potential investors, there's no better vehicle to fundraise or source deals than FII.

Don't miss this chance to back the next wave of industrial innovation championed by Aramco and Prosperity7 Ventures. Access the Investor Briefing and coordinate a 1:1 with Founders during the FII PRIORITY Miami Summit (March 25-27) using the FII mobile app.

Presenting Ventures:

- AJ Abdallat, Founder & CEO, Beyond Limits, United States
Amit Gupta, CEO, Aeroseal, United States
Ben Leiken, CTO, Arkesto, Inc., United States
John Michael Melby, CEO, Xpansiv, United States
Seonghoon Woo, CEO, Amogy, Inc., United States

### BOARD OF CHANGEMAKERS: A NEW GEOGRAPHY FOR INVESTMENT

Growing national economic competition and society-wide technological disruption is forcing coordination between private and public leaders at levels not seen in decades. As traditional strategies disappear and new rules emerge, how are the biggest players not just adapting to but leading this new economic order?

**Speakers:**

- H.E. Mohammed bin Abdullah Al-Jadaan, Minister of Finance, Kingdom of Saudi Arabia
- H.E. Sebastian Kurz, Former Chancellor of Republic of Austria, Co-Founder & President, DREAM, Austria
- Mohamed Alabbar, Founder, Emaar Properties, Founder, Noon.com, United Arab Emirates
- Betsy Atkins, Google Cloud Advisory Board & Member of Board of Directors, GoPuff & Wynn LasVegas, United States
- William E. Ford, Chairman & CEO, General Atlantic, United States
- Dr. Fei-Fei Li, Professor, Stanford University; Co-Founder & CEO, World Labs, United States
- Stephen M. Ross, Founder & Non-Executive Chairman, Related Companies, Chairman of the Board & Managing General Partner, Miami Dolphins, United States

Panel Discussion

### WHAT DOES THE NEW US-LATAM DEAL ARCHITECTURE LOOK LIKE?

The strategic reset across the Americas is producing a new generation of bilateral investment structures between the U.S. and Latin America that did not exist five years ago. Inbound M&A deal volume in Latin America surged 45% in 2025 to \$40.6 billion, with the United States reclaiming its position as the region's leading cross-border investor after a 407% year-over-year jump in U.S. deal volume. As Washington recalibrates its economic posture toward the hemisphere and sovereign players from the Gulf deepen their footprint, what will the deal frameworks, governance terms, and partnership models of this new corridor actually look like?

**Speakers:**

- Naif Alissa, CIO, Saudi Eksab, Kingdom of Saudi Arabia
- Norberto Giangrande Jr., Chairman, Minerva Foods, Brazil
- Secretary Steven T. Mnuchin, Founder & Managing Partner, Liberty Strategic Capital, 77th Secretary of Treasury of the United States

**Moderator:** Soledad O'Brien, CEO, Soledad O'Brien Productions

### HOW DOES THE US-GULF INVESTMENT RELATIONSHIP PERFORM UNDER PRESSURE?

The financial interdependence between the United States and the Gulf has no modern precedent: sovereign wealth funds controlling roughly 40% of global SWF assets have made America their largest destination for cross-border capital, while Washington has made Gulf partnerships central to its AI, defense, and energy strategies. Recent bilateral commitments between the U.S. and Gulf states have exceeded \$600 billion, spanning defense, aerospace, energy, and technology. When political cycles, trade realignments, and competing global priorities test the architecture connecting the world's largest pool of sovereign capital to the world's largest economy, what bends, what holds, and what gets stronger?

**Speakers:**

- Jared Kushner, Founder & CEO, Affinity Partners, United States

**Moderator:** Richard Attias, Chairman of the Executive Committee & Acting CEO, FII Institute

Panel Discussion

IS THE HYPERSCALER PARTNERSHIP THE MOST IMPORTANT DEAL A NATION CAN MAKE?

A country's economic competitiveness increasingly depends on which technology platform it partners with, as AI infrastructure becomes as strategic as energy grids, ports, and defense systems. McKinsey estimates that sovereign AI could represent a \$600 billion market by 2030, with 71% of executives and government officials surveyed calling it an existential concern or strategic imperative. When a single hyperscaler's annual capex rivals a nation's entire digital economy, what do the partnership terms, workforce commitments, and ownership structures need to look like to ensure both sides win?

Speakers:

- H.E. Mohammed Al-Sheikh, Minister of State; Member, Council of Ministers; Board Member, Public Investment Fund (PIF), Kingdom of Saudi Arabia
Dina Powell McCormick, President & Vice Chairman, Meta, United States

Moderator: Richard Attias, Chairman of the Executive Committee & Acting CEO, FII Institute

HOW TO GO AI-NATIVE

Every company is increasingly pressured to prove they can successfully incorporate AI into their work streams and garner significant return. Yet, despite the hype, a recent MIT study found that 95% of corporate Gen-AI pilots have failed to deliver any measurable impact, showing the challenge is not the technology but fitting it into existing structures. How are leading companies creating ecosystems where they balance disrupting themselves to create AI-native workflows with maintaining their enterprise identity?

Speakers:

- Tareq Amin, CEO, HUMAIN, Kingdom of Saudi Arabia
Gary Cohn, Vice-Chairman, IBM, United States
Tony Douglas, CEO, Riyadh Air, Kingdom of Saudi Arabia

Moderator: Zain Asher, Anchor, CNN

11:25 AM – 11:55 AM

PRIVATE CAPITAL

PLENARY

Panel Discussion

HAS PRIVATE CAPITAL OUTGROWN THE PUBLIC MARKET?

The most consequential shift in global finance is no longer about which stocks are rising or falling; it is about whether the public market itself still sits at the center of the system. In 2025, global buyout and growth deals above \$500 million surged 44% to eclipse \$1 trillion for the first time on record, while more than 16,000 PE-backed companies globally had been held for over four years, representing 52% of total buyout inventory, according to McKinsey. With the highest-growth assets staying private longer, sovereign capital flowing into direct deals, and private credit replacing traditional bank lending at scale, what does transparent capitalism look like when the most valuable parts of the economy never reach a public exchange?

Speakers:

- Mary Callahan Erdoes, CEO, J.P. Morgan Asset & Wealth Management, United States
Ilan Goldfajn, President, Inter-American Development Bank, United States
Scott Goodwin, Co-Founder & Managing Partner, Diameter Capital Partners, United States
David Manlowe, CEO, Benefit Street Partners, United States
Ken Moelis, Executive Chairman, Moelis & Company, United States

HOW AFRICA WILL TURN ITS DEMOGRAPHIC BOOM INTO ECONOMIC DESTINY

While developed nations face rapidly shrinking labor pools, Africa is uniquely positioned to become the world's primary engine of future growth if it can channel investment into the sectors that unlock that potential. According to recent World Bank projections, Sub-Saharan Africa's working-age population will expand by more than 620 million people between 2025 and 2050, accounting for more than three-quarters of the net increase across all emerging markets and developing economies. How can leaders leverage strategic investments in agriculture and education, alongside regional coordination on infrastructure, trade, and governance, to transform this unprecedented demographic momentum into lasting economic power?

## HOW DO EXPERIENCES CAPTURE ALL OF LUXURY'S GROWTH?

Experiential categories have accounted for all of luxury’s net growth since 2023, even as the sector lost 60 million consumers and personal goods margins fell to their lowest level since 2009. The latest Bain-Altgamma study shows luxury hospitality, dining, and travel outperforming tangible goods across every region in 2025, with fewer than half of personal luxury goods brands managing to grow revenue. If the wealthiest consumers are permanently reallocating spend from products to experiences, how do investors build durable businesses in sectors from hospitality to real estate around something that disappears the moment it happens?

**Speakers:**

INVITE ONLY: DEFINING "CAPITAL IN MOTION": AN ALLOCATOR-LED FRAMEWORK FOR A NEW GLOBAL INDEX

Long-term institutional capital plays a decisive role in shaping economic resilience, growth trajectories, and development outcomes. Yet existing indices often fail to capture how this capital is actually deployed, sustained, and redirected over time. Establishing a shared, allocator-informed definition of "capital in motion" presents a critical opportunity to ground the FII Institute's forthcoming Capital in Motion Index in real-world investment behavior rather than in theoretical or reporting-based constructs. This session convenes leading sovereign wealth funds, pension funds, development banks, and strategic corporate investors to inform the core thesis, definitional boundaries, and analytical lens of the index, ensuring its relevance and credibility within the long-term allocator ecosystem. The discussion will also surface principles for inclusion, exclusion, and differentiation that will guide index development and position it as a meaningful new tool in the global capital landscape, particularly as markets evolve toward a more digital-assets-heavy future.

Chair:

- Stephen Dainton, President, Barclays Bank & Head, Investment Bank Management, Barclays, United Kingdom

3:30 PM – 4:40 PM

TIERRA SANTA

INVITE ONLY: THE CREATOR ECONOMY VS. HOLLYWOOD: THE FIGHT FOR THE FUTURE OF IP

The media landscape has reached a definitive tipping point, with the creator economy projected by Goldman Sachs to be worth nearly \$500 billion by 2027 fueled by a staggering \$235 billion in ad revenue, a figure that now outpaces traditional television and film combined. While Hollywood struggles to recalibrate business models for the digital era, creators are leveraging decentralized platforms and bypassing traditional gatekeepers to build massive, original IP like MrBeast and Ms. Rachel, the latter of which became a top-10 most-watched show on Netflix in 2025. As the balance of cultural and economic power shifts from studio lots to creator platforms, where should you be placing your capital, partnerships, and conviction?

TOURISM

PLENARY

Panel Discussion

## WHERE IS THE SMART MONEY IN TRAVEL INFRASTRUCTURE?

Travel and tourism is no longer a soft sector; it is one of the largest capital allocation stories in the global economy. The industry contributed a record \$11.7 trillion to global GDP in 2025, accounting for 10.3% of worldwide output, while global investment in the sector surpassed \$1 trillion in 2024 alone, according to the World Travel and Tourism Council. Yet the returns increasingly flow not to the destinations with the best scenery but to those with the best systems: airports, hospitality networks, and transport links built to convert visitor demand into repeatable revenue. Where exactly should capital go to capture the next wave of travel growth, and what separates infrastructure that pays for itself from infrastructure that does not?

### Speakers:

- Manfredi Lefebvre d'Ovidio, Chairman, WTTC, Monaco

AI POLICY

PLENARY

Fireside Chat

## SHOULD GOVERNMENTS LEAD OR FOLLOW ON AI?

Nearly every major economy now has a national AI strategy, yet the technology's trajectory is still overwhelmingly set by a handful of private companies spending at a scale no government can match. In 2024, U.S. private AI investment alone reached \$109 billion, nearly 12 times China's and 24 times the United Kingdom's, while just four American hyperscalers committed over \$360 billion in AI-related capital expenditure for 2025, according to the Stanford AI Index. When the gap between sovereign ambition and private-sector capacity is this wide, should governments be writing the rules, building the infrastructure, or simply staying out of the way?

### Speakers:

- Director Michael Kratsios, Assistant to the President & Director, White House Office of Science and Technology Policy, United States

## WHICH COMPUTE HUBS WILL WIN THE NEXT WAVE OF AI?

Traditional hyperscalers leapt to power the first wave of AI adoption, capturing massive value. Yet, as compute demand continues to rush in, with PwC estimating that AI could add up to \$15.7 trillion to global GDP by 2030, physical constraints like energy production and connectivity at traditional sites are preventing even these companies from truly hyper scaling. What are the physical keys to success that will crown the winners of the next waves of AI adoption?

## BUILDING A WORLDWIDE MYTHOLOGY, NOT JUST A BLOCKBUSTER

As the entertainment industry undergoes heavy disruption from AI, history shows that the greatest innovations in the sector take place outside of traditional studios. At the same time, industry-wide change takes more than just an idea—the cinematic universe bet that launched Marvel from a \$400 million to \$4 billion valuation in just 6 years still has yet to be replicated. In the blossoming entertainment ecosystem of film, AI, gaming, web3, and more, what are the lessons to be learned as to how the next cinematic universe will be financed, built, and distributed?

**Speaker:**

- [David Maisel, Founder, Marvel Studios, United States](#)

## IS THE FUTURE OF GAMING STILL GLOBAL?

Gaming continues to be the definitive entertainment asset class, with high-growth accelerating an already large market share. Yet, the field is ripe with change: developing economies in Asia and the Middle East are driving the most growth with numbers as high as 8% projected for the next five years. As new markets bring new preferences such as smartphone gaming over consoles, is the future of gaming still driven by established giants, or will regional upstarts excel with local expertise?

CAN ELITE GRIT GUARANTEE ROI?

From tennis courts to boardrooms, the world's top performers share one thing in common: the relentless pursuit of reinvention. According to the International Tennis Federation, over 40% of new tournaments are now being hosted in emerging markets—proof that the power of sport is shifting and expanding worldwide. As athletes, entrepreneurs, and leaders redefine what success looks like, how can lessons in resilience, rivalry, and reinvention shape the future of performance and purpose?

HOW DO POWER & CAPITAL FLOW?

To a degree unprecedented in the past few decades, capital allocation is being shaped as much by regulatory alignment and economic bloc formation as by pure return optimization. According to the ECB, the past three years have seen almost 3x more FDI within aligned economic blocs as between. With investors navigating an increasingly fragmented global system, what are the ramifications of capital flowing along institutional and regulatory lines rather than purely financial ones?"

WHAT DOES IT TAKE TO BUILD AN ENDURING MEDIA LEGACY?

Enduring storytelling is shaped by visionary creative bets, disciplined franchise development, and the ability to adapt early to new platforms and business models. According to PwC's Global Entertainment & Media Outlook 2025–2029, global entertainment and media revenues edged just under 3 trillion dollars in 2024 and projected to reach 3.5 trillion dollars by 2029, reflecting steady expansion across digital formats. In an era of fragmented attention and shifting formats, what does it really take for today's storytellers and studios to still matter 25 years from now?

Speakers:

- David Ellison, Chairman & CEO, Paramount, A Skydance Corporation, United States

Moderator: Gerry Cardinale, Founder, Managing Partner & CIO, RedBird Capital Partners, United States

### DO SPORT & CULTURE HAVE EXPONENTIAL RETURN?

Massive-scale sport and culture events like the FIFA World Cup are engines of economic growth. Beyond the \$10.9 billion FIFA expects the 2026 tournament will generate in revenue, it also predicts up to \$30 billion in surrounding economic impact. Yet, from reverberating cultural influence to large-scale, adjacent public infrastructure improvements, just how far does the return on sport and culture extend?
